Summary

Computer Science Engineering graduate specializing in AI & ML with strong skills in Java, Spring Boot, REST APIs, SQL, and full-stack development. Experienced in building AI-powered and database-driven applications with a focus on problem-solving, clean code, and scalable backend development.

Technical Skills

Programming	Java, Python, JavaScript, SQL
Core CS	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Backend	Spring Boot, Spring MVC, Spring Data JPA, Spring Security, REST APIs, JDBC
Frontend	HTML, CSS, JavaScript, React.js
Databases	MySQL
AI / ML	Basic concepts of Machine Learning and AI
Tools	Git, GitHub, Maven, Postman, Eclipse, VS Code, Render

Projects

InterviewMate – AI-Powered Interview Preparation Platform

[Live Demo](#)

Java, Spring Boot, MySQL, JavaScript, REST APIs, Groq API, Brevo, Chart.js, Render

- Developed a full-stack AI-powered interview preparation platform supporting technical and coding interviews with automated answer evaluation, scoring, feedback, and personalized recommendations.
- Integrated Groq API for AI-driven answer analysis and generated comprehensive performance reports containing quantitative scores, strengths, weaknesses, and targeted action items.
- Implemented Spring Boot REST APIs, user authentication, secure email OTP verification, interview history tracking, persistent report storage, and automated report delivery using Brevo SMTP.
- Built a performance analytics dashboard using Chart.js to dynamically visualize interview-wise score progression, average competency metrics, and best overall scores across multiple sessions.
- Designed responsive, mobile-friendly user interfaces enabling seamless interview session navigation, real-time feedback rendering, and user profile management.
- Deployed the robust Spring Boot backend and optimized frontend assets onto Render with production database connectivity, secure environment variable configurations, and full CORS setup.

Food Delivery Web Application

[GitHub](#)

Java, Servlets, JSP, JDBC, MySQL, HTML, CSS, JavaScript

- Developed a full-stack food ordering platform using Java EE and MVC architecture, leveraging Servlets as Controllers, JSP as Views, and Java Beans as Models.
- Implemented robust user authentication, secure session management, restaurant browsing, dynamic menu management, cart manipulation, address management, and order placement workflows.
- Designed reusable DAO classes utilizing JDBC and PreparedStatement to execute high-performance CRUD operations while completely preventing SQL Injection vulnerabilities.
- Managed user login sessions and shopping cart state using HttpSession, ensuring reliable and persistent user state retention across multiple concurrent requests.
- Applied Object-Oriented Programming principles including Encapsulation, Abstraction, Inheritance, and Polymorphism to construct a modular, highly scalable backend services layer.

Education

2022 – 2026	B.Tech in Computer Science Engineering (AI & ML) <i>JNTUH Affiliated College</i>	CGPA: 8.5/10
2020 – 2022	Intermediate (MPC)	CGPA: 9.1/10
2020	SSC	CGPA: 10/10

Certifications & Achievements

- Solved 200+ coding problems on various coding platforms.
- Winner – 1st Prize, College Hackathon for an AI-powered Lost and Found System.
- Full Stack Java Development Certification – Tap Academy.
- Completed NPTEL certification in Introduction to Large Language Models.
- Participated in AI HackDays 2025 at Tech Mahindra.
